[TIMESTAMP]

THE STANDARD

- Raw records are leads, not published Signals.
- Published Signals are human verified.
- Factual claims come from named evidence.
- Record IDs are provided where practical.
- Analysis is labeled.
- Preliminary data is labeled.
- Unknowns are stated.
- Corrections are public.

## What still must happen before a live send

**The design is ready; deliverability and real-client checks remain operational gates.**

- 01 Populate the confirmed Graham & Gold, LLC physical mailing address in Mailchimp.
- 02 Complete SPF/DKIM authentication for thefloridasignal.com.
- 03 Use Florida Signal as From name and desk@thefloridasignal.com as From/reply-to.
- 04 Replace subject, preheader, campaign slug and every bracketed editorial placeholder.
- 05 Delete unused modules and the component library before the campaign send.
- 06 Seed-test Gmail web/mobile, Apple Mail on iPhone and Outlook with images off and dark mode.
- 07 Click every public-record, archive, share, preference and unsubscribe link.
- 08 Confirm Mailchimp open and click tracking are enabled; never send the master itself.
